Outgoing Students at Technion

Technion undergraduate students can expand their horizons and their academic experience by spending some of their academic study time abroad.

Technion Student Exchange Program allows undergraduate students to spend a semester abroad at one of Technion's Partner Universities,and use such studies as partial credits toward their Technion bachelor's degree.

Students must apply for studies abroad through the **Student Exchange Coordinator**. Students who are considering signing up for a Technion Student Exchange program must apply in the **fall semester** of the academic year prior to their expected travel. This means students need to apply during their 3rd semester in order to do a semester abroad during their 5th or 6th semester.

The presentation shown during the outgoing students assembly can be found here (http://int.technion.ac.il/wp-content/uploads/2018/11/Outgoing-PPT-for-students-info-session.pdf). Download the Check-List for the Outgoing Student here (http://int.technion.ac.il/wp-content/uploads/2018/11/Check-list-for-outgoing-students-201920.pdf).

Before starting – get familiar with the following definitions

Student-Exchange is a program that allows students to study at a foreign university who is an exchamge partner of the Technion, while paying regular tuition to the Technion.

Study-Abroad is a program that allows students to study at **any** foreign university (not exchange partner) while paying full tuition to the foreign university.

Partner University is a university with whom the Technion has signed a collaboration agreement. Some partner universities include student exchange agreements, allowing students to visit in a Student Exchange program. Student exchange agreement might include all Technion Faculties or might be only with specific faculties within the Technion.

Home Faculty refers to the faculty at the Technion where the student is studying and registered.

Host University refers to the foreign university in which a student visits and studies either in a Student Exchange or a Study Abroad program.

GE3 – Global E³ is an exchange program for engineering students: a student can study abroad while continuing to pay tuition at home. With member universities in over 20 countries, students at over 70 universities have the opportunity to study abroad. Global E³ exchanges about 250-300 students a year. Students are nominated by their home institution and receive credit at home for academic work completed abroad. They study overseas in a member institution for one or two semesters, typically in their junior year.

Choosing your host university

In order to decide which university is the right choice for you, Technion International recommends checking the following information:

Semester dates – which semester is most suitable for your travels, taking your studies and the Technion semester dates into consideration

Course catalog – does the university you are interested in offer courses that are relevant to your degree?

Cost of living – will you be able to afford the cost of living in city where the host university is based?

In order to find this information, Technion International recommends going to the host university's international office's website and more specifically search for the incoming exchange website.
